

# Boomi Developer Project Portfolio

Boomi Developer Portfolio

Ankita Digambar Napte

## 1. Project: Retail EDI Integration

Client: US Retail Chain

Description:

- Built Boomi processes to handle EDI 850, 810, 856 documents.
- Used FTP/SFTP/AS2 connectors for partner data exchange.
- Implemented dynamic routing with Lookup Tables.
- Applied Try/Catch and Notify for error handling and auto reprocessing.

## 2. Project: Salesforce-NetSuite Customer Sync

Client: SaaS Product Company

Description:

- Designed bi-directional sync using Salesforce and NetSuite connectors.
- Used Map, UDFs, and Decision logic to clean and route customer data.
- Applied field validation and error routing.
- Improved data integrity and eliminated manual syncs.

## 3. Project: HR File Loader

Client: Infosys Internal IT

Description:

- Automated daily HR file loads into Oracle using JDBC connector.
- Used Flat File Profiles and process scheduling.
- Implemented alerting and exception handling for record errors.

Technical Highlights:

- Tools: Dell Boomi AtomSphere, Boomi API Management, Boomi Connectors
- Integration Types: Batch, Real-Time, Bi-Directional
- Key Skills: Exception Handling, Document Properties, Lookup Tables, UDFs, CI/CD
- Protocols: FTP, SFTP, AS2, REST, SOAP

# **Boomi Developer Project Portfolio**

- Data Sources: Salesforce, NetSuite, SAP, Oracle DB, Flat Files
